

Market Survey of Long-Term Care Costs

The 2012 MetLife Market Survey of Nursing Home,
Assisted Living, Adult Day Services, and
Home Care Costs

November 2012

The MetLife Mature Market Institute®

Celebrating its 15-year anniversary in 2012, the MetLife Mature Market Institute is Metropolitan Life Insurance Company's (MetLife) center of expertise in aging, longevity and the generations and is a recognized thought leader by business, the media, opinion leaders and the public. The Institute's groundbreaking research, insights, strategic partnerships and consumer education expand the knowledge and choices for those in, approaching or working with the mature market.

The Institute supports MetLife's long-standing commitment to identifying emerging issues and innovative solutions for the challenges of life. MetLife, Inc. is a leading global provider of insurance, annuities and employee benefit programs, serving 90 million customers. Through its subsidiaries and affiliates, MetLife holds leading market positions in the United States, Japan, Latin America, Asia, Europe, the Middle East and Africa. For more information, please visit: **www.MatureMarketInstitute.com**.

Major Findings

In 2002, the MetLife Mature Market Institute pioneered the collection of national market survey data on nursing home, assisted living, and home care costs. Since then, these market survey data have been updated and released on an annual basis. In 2007, cost information on adult day services (ADS) was included for the first time.

This market survey, conducted in conjunction with LifePlans, Inc., contains daily private-pay rates for private and semi-private rooms in licensed nursing homes, monthly base rates for assisted living communities, hourly rates for home health aides from licensed agencies and agency-provided homemaker companion services, and daily rates for adult day services across the United States. Geographic areas reported are for state Metropolitan Statistical Areas (MSAs), and a randomly selected sample of service providers or facilities not already identified in the MSAs (“Rest of State” areas). Costs for this survey were calculated for each service provider in an area and were aggregated across all providers to compute a statewide average cost.

Nursing Homes

Daily private-pay rates for long-term (custodial) nursing home care were obtained for private and semi-private rooms in licensed facilities throughout the U.S.

National average rates for a private room increased by 3.8%, from \$239 daily or \$87,235 annually in 2011, to \$248 daily or \$90,520 annually in 2012. National average rates for a semi-private room increased by 3.7%, from \$214 daily or \$78,110 annually in 2011, to \$222 daily or \$81,030 annually in 2012.

In 2012, the Rest of State area of Oklahoma had the lowest average daily rates for a private room at \$147 per day. For a semi-private room, the Rest of State area of Texas had the lowest average daily rates at \$131 per day. The highest average daily rates for nursing homes were in Alaska, which came in at \$687 for a private room and \$682 for a semi-private room.

Assisted Living Communities

Monthly private-pay base rates, which are defined as room and board and typically include at least two meals per day, housekeeping, and some personal care assistance, were obtained for one-bedroom apartments or private rooms with private baths in assisted living communities.

National average assisted living base rates increased by 2.1%, from \$3,477 monthly or \$41,724 annually in 2011, to \$3,550 monthly or \$42,600 annually in 2012.

In 2012, the Rest of State area of Arkansas had the lowest average monthly base rate at \$2,355, and Washington, D.C. had the highest average monthly base rate at \$5,933.

Home Care Services

Hourly private-pay rates were obtained for home health aides from licensed agencies and for agency-provided homemaker/companion services.

The 2012 national average private-pay hourly rates for home health aides remain unchanged from 2011 at \$21. The national average hourly rate for a homemaker increased by 5.3%, from \$19 in 2011 to \$20 in 2012.

The lowest average hourly rates for home care came from the Shreveport Area of Louisiana at \$13 for both a home health aide and homemaker/companion. The highest average hourly rates for home care came from the Rochester Area of Minnesota at \$32 for a home health aide and \$28 for a homemaker/companion.

 **Adult Day Services**

Private-pay daily rates were obtained for adult day services. Adult day services national average daily rates remain unchanged since 2011 at \$70 per day.

In 2012, the Montgomery Area of Alabama had the lowest average daily rate at \$26, while Vermont had the highest average daily rate at \$141. Rates for these centers varied greatly, both locally and statewide. However, it is important to note that licensure requirements and other regulations vary from state to state and this will account for some of these significant rate differences. Also, since some centers, by choice or regulation, only provided daily rates, hours of operation for centers providing hourly rates will affect calculated daily rates in comparison.

Table 1: Summary of National Findings*

Rate Type	Nursing Homes		Assisted Living Communities	Home Care		Adult Day Services
	Semi-Private Room	Private Room		Home Health Aide	Homemaker	
	Daily		Monthly	Hourly		Daily
2012 Average Rate	\$222	\$248	\$3,550	\$21	\$20	\$70
2011 Average Rate	\$214	\$239	\$3,477	\$21	\$19	\$70
\$/% Increase from 2011	\$8 (3.7%)	\$9 (3.8%)	\$73 (2.1%)	\$0 (0%)	\$1 (5.3%)	\$0 (0%)
2012 Median Rate	\$206	\$231	\$3,324	\$21	\$19	\$65
2012 Highest Average Rate	\$682	\$687	\$5,933	\$32	\$28	\$141
Location	AK—Statewide	AK—Statewide	DC—Washington	MN—Rochester Area	MN—Rochester Area	VT—Statewide
2012 Lowest Average Rate	\$131	\$147	\$2,355	\$13	\$13	\$26
Location	TX—Rest of State	OK—Rest of State	AR—Rest of State	LA—Shreveport Area	LA—Shreveport Area	AL—Montgomery Area
2012 Annual Rate	\$81,030	\$90,520	\$42,600	\$21,840	\$20,800	\$18,200

*Costs are rounded to the nearest dollar.
 Annual rates for home care are based on 4 hours per day, 5 days per week; annual rates for adult day services are based on 5 days per week.

Overview and Analysis

Nursing Homes

A nursing home is a facility which provides residents with a room, meals, personal care, nursing care, and medical services. Nursing homes provide care to residents with chronic conditions requiring long-term care or for those needing a shorter term acute recovery period after hospitalization. Typically, patients in long-term care facilities require assistance with multiple activities of daily living (ADLs), which include bathing, dressing, eating, toileting, transferring in and out of chairs or beds, and continence, and/or have cognitive limitations due to Alzheimer's disease or another form of dementia.

Admission to a nursing home could be for short-term rehabilitation services; however, for many Americans, the move to a nursing home is a permanent one. The nursing home resident may have a chronic condition, a need for assistance with multiple ADLs, or a cognitive impairment requiring a level of care that prevents him or her from living independently or at lower levels of care. Nursing homes provide a secure environment and an array of services to meet the physical, medical, and social needs of their residents.

Services provided at nursing homes typically include:

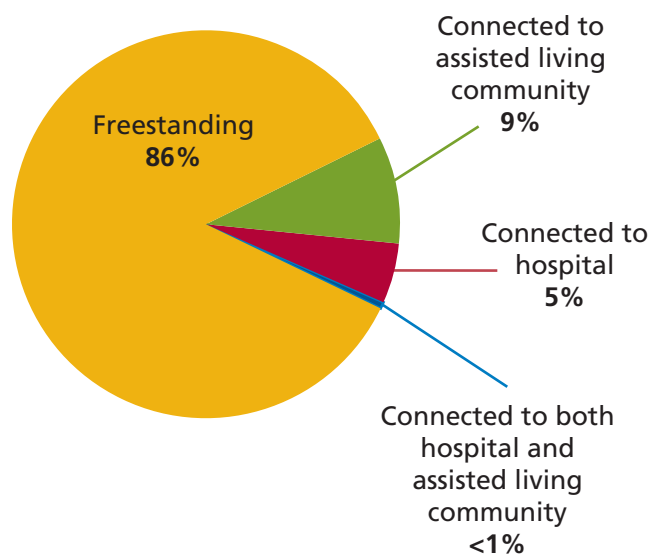

- › Room and board
- › Nursing care
- › Medication management
- › Personal care (assistance with ADLs)
- › Social and recreational activities

A small percentage (9%) of nursing homes surveyed provide adult day services. Most often, these services are open to residents of the nursing

home as well as the community (74%). Two in 10 (20%) offer adult day services to the community only and 6% offer them to residents of the nursing home only.

According to the U.S. Census Bureau, in 2011, 66% of nursing home residents were women, and only 16% of all residents were under the age of 65. The median age of residents was 82.6 years.¹ *The 2012 Market Survey of Long-Term Care Costs* found that 86% of all nursing homes surveyed are freestanding facilities. The remaining are physically connected to or on the same grounds as an assisted living community (9%), hospital (5%), or both (<1%). Eleven percent of nursing homes surveyed have an associated assisted living unit or wing, and 8% are part of a continuing care retirement community (CCRC).

Figure 1: Nursing Homes: Physical Connection to Hospital or Assisted Living Community

Alzheimer’s and Dementia Care in Nursing Homes

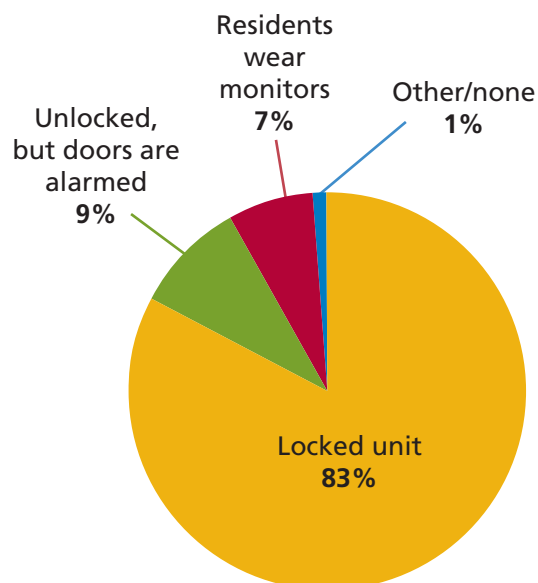

Over half (56%) of the nursing homes surveyed provide Alzheimer’s or dementia care, of which approximately 80% charge the same rate for someone with Alzheimer’s or dementia. However, of the few that charge a different rate, the average daily rate for a private room is \$261 (\$95,265 annually), and \$230 (\$83,950 annually) for a semi-private room.

Average Nursing Home Room Rate for Alzheimer’s and Dementia Care*	
Private Room	Semi-Private Room
\$261 Daily	\$230 Daily
\$95,265 Annually	\$83,950 Annually

*Of nursing homes that report a different rate for individuals with Alzheimer’s or dementia.

Over half (55%) of nursing homes that provide Alzheimer’s or dementia care have separate units or wings, and 2% reported that the whole facility provides Alzheimer’s care. There are various ways that these units are secured—83% are locked units, 9% are unlocked, but have alarms on the doors, and 7% provide monitors for residents to wear. The remaining 1% have other security measures in place or none at all.

Figure 2: Method of Security for Separate Alzheimer’s/Dementia Wings in Nursing Homes*

*Of nursing homes that provide Alzheimer’s/dementia care in separate wing or unit.

Assisted Living Communities

In the continuum of care, assisted living bridges the gap between home care and nursing homes. It provides services for those who are not able to live independently, but do not require the level of care provided by a nursing home. Residents of assisted living communities may need personal care, assistance with meal preparation, ADLs, and household chores, and/or require supervision due to a cognitive impairment related to disorders such as Alzheimer’s.

Overview and Analysis

Assisted living communities provide housing for those who need help in day-to-day living, but who do not need the round-the-clock level of skilled nursing care found in nursing homes. Many communities, however, have nurses on staff and provide health care monitoring.

Current estimates indicate that the average age of an assisted living resident is 86.4 years old.² Most assisted living communities create an individual care plan for each resident that details the services required. This plan is usually updated regularly to ensure that residents receive proper care as their conditions change.

While the term “assisted living” is used in many parts of the country, other common terms include:

- › Residential care
- › Personal care
- › Adult congregate living care
- › Board and care
- › Domiciliary care
- › Adult living community
- › Supported care
- › Enhanced care
- › Community-based retirement community
- › Adult foster care
- › Adult homes
- › Sheltered housing
- › Retirement residence
- › Service-enriched housing

Oversight of assisted living communities is primarily in the hands of state governments rather than under federal regulation. In 2007,

several states strengthened existing standards or implemented new standards for communities with residents with Alzheimer’s disease or other forms of dementia. Some states increased training requirements for staff or added disclosure requirements to prospective residents.

Depending upon their chosen level of service, residents in assisted living communities may have the following services offered:

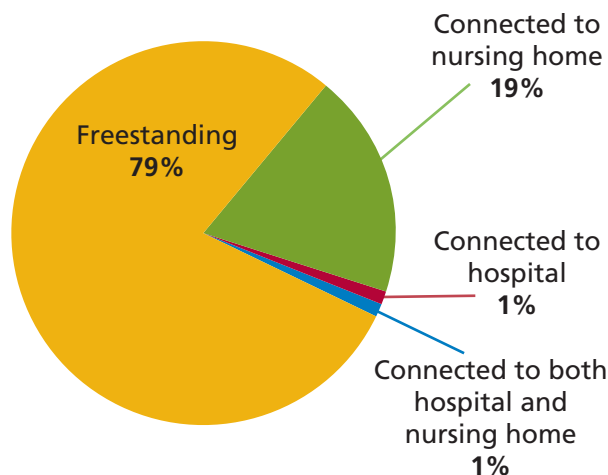

- › Care management and monitoring
- › Help with ADLs
- › Housekeeping and laundry
- › Medication management
- › Recreational activities
- › Security
- › Transportation
- › Two or more meals per day

Some communities, particularly continuing care retirement communities (CCRC) offering multiple levels of care from independent living through nursing home care, also charge a one-time entrance fee and have additional fees for items such as meal delivery to living quarters, dementia care, or extra transportation services. A growing number of states have begun covering assisted living costs for those low-income individuals who qualify through Medicaid waiver programs, although most residents pay privately or through a long-term care insurance policy. Sixteen percent of the communities surveyed are part of a CCRC, and 1% charge an entrance fee.

The majority of communities surveyed (79%) are stand-alone, meaning they are not physically connected to or on the same grounds

of a nursing home or hospital. Only 1% are connected to a hospital and 19% are connected to a nursing home. Another 1% are connected to both a hospital and nursing home.

Figure 3: Assisted Living Communities: Physical Connection to Hospital or Nursing Home

Alzheimer's and Dementia Care in Assisted Living Communities

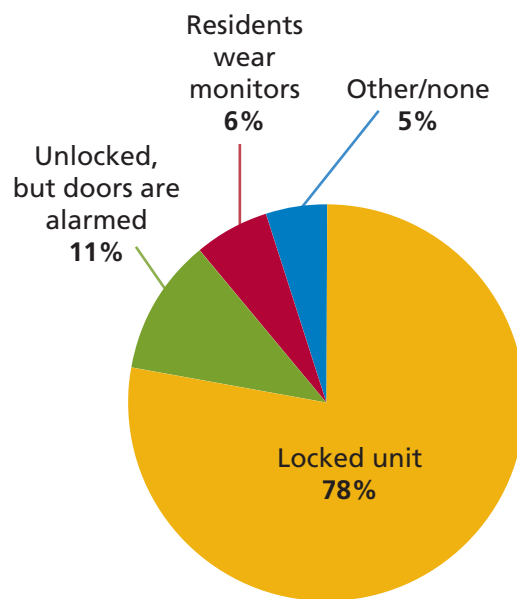

About half (51%) of the assisted living communities surveyed provide Alzheimer's and dementia care for residents, 61% of which charge an additional fee for this service. The 2012 national average monthly base rate for Alzheimer's and dementia care is \$4,807 (\$57,684 annually).

Average Assisted Living Base Rate for Alzheimer's and Dementia Care*	
\$4,807 Monthly	\$57,684 Annually

*Of assisted living communities that report a different rate for individuals with Alzheimer's or dementia.

Of the communities that provide Alzheimer's and dementia care, 74% have a separate unit, and most communities are locked or alarmed to ensure the safety and security of residents receiving special care.

Figure 4: Method of Security for Alzheimer's/Dementia Care in Assisted Living Communities*

*Of nursing homes that provide Alzheimer's/dementia care.

Some assisted living communities offer adult day services, both to their residents and the community. Fifteen percent of the facilities surveyed offer adult day services. Of those that offer these services, 81% report that both residents and those in the community can use these services. Another 9% provide services to the community only, and 10% provide services to the residents only.

Overview and Analysis

Base Rates

The 2012 Market Survey of Long-Term Care Costs reports on monthly base rates, therefore it is important to know what services are included and what services may be offered on an a la carte basis, thus impacting the overall cost of care once someone actually resides in the community. As residents age, they may experience a reduction in their capacities and require additional services over time that were not required when they entered the community.

As noted in the 2008–2011 surveys, fees for additional services can vary considerably by community size. Regardless of size, base rate fees often cover only some of the total costs of needed assisted living services. Communities will vary on the number of services that are included in the base rate.

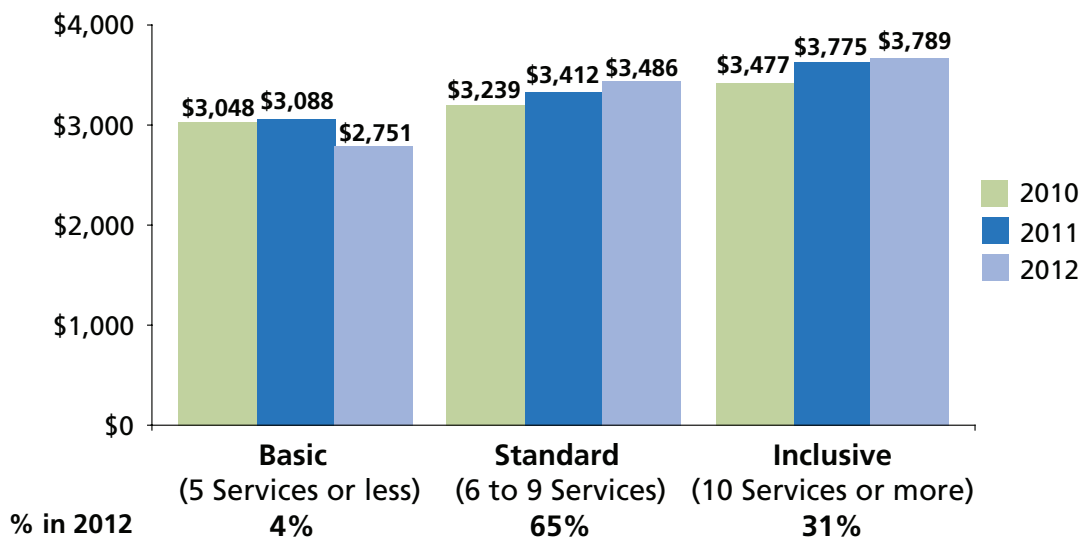

Beginning in 2008, information on 12 services provided by assisted living communities was collected and analyzed based on the number of services covered in the monthly base rate, or services which are available on-site at the community.

Communities were first categorized by the number of services included in the base rate. Communities that included five or fewer services in their base rate were characterized as “basic,” those that provided six to nine services in their base rate were characterized as “standard,” and those that included 10 or more services in their base rate were considered to be “inclusive.”

Of those surveyed in 2012, 4% of communities were in the basic category, 65% were in the standard category, and 31% were in the inclusive category.

Monthly base rate costs typically increase as more services are included. In 2012, communities in the basic category cost an average of \$2,751, a 10.9% decrease from 2011. Those in the standard category have an average base cost of \$3,486, a 2.2% increase over 2011. Communities in the inclusive category cost an average of \$3,789, an increase of 0.4% over 2011. Figure 5 illustrates the service categories, average base cost for the category, and percentage of communities that fall into each category for 2010–2012.

Figure 5: Monthly Base Costs for Assisted Living by Number of Services Included, 2010–2012

Consumers are often faced with a varied array of communities and services in a local area, and must make comparisons and decisions about communities which may have a significant financial impact on them. With this in mind, consumers and financial advisors should consider carefully when making comparisons, and be especially mindful to gather information about services included in the monthly base cost and the cost of services not included. When faced with paying thousands of dollars each month for care which will not be covered by Medicare, even a few dollars in lowered cost is attractive. However, it is in their best interest to make comparisons on total potential costs for equivalent levels of service, and not simply on monthly base rates.

Although a community in the “basic” category might cost \$2,751 monthly, if additional services are needed, the monthly cost might rise above what a community in the “standard” or even “inclusive” category would charge for the same amount of services. The following table shows average monthly costs for common services offered at assisted living communities.

Average Monthly Charge for Services Not Included in the Base Rate*	
Bathing assistance	\$181
Dressing assistance	\$236
Other personal care (i.e., transferring, toileting, continence care, eating)	\$504
Medication management	\$347

**Of assisted living communities who report an additional monthly charge for services above. It is important to note that many were unable to separate bathing and/or dressing charges from other personal care charges.*

Home Care Services

The desire for families and friends to remain at home, or “age in place,” has created a diverse and dynamic home care service industry and a variety of service providers. Caregivers can be hired through an agency, registry, or privately, and because every state has authority to license and regulate its home care agency system, there are often variations in licensure requirements and regulations from state to state. Medicare-certified agencies are the exception in that they must comply with federal regulations.

Aging adults may choose to live on their own for many years. For people who develop chronic illnesses and other conditions, aging in place often demands outside services, which can allow them to live as independently as possible in their own homes. Most home care is non-medical care provided by paraprofessionals. However, some home care can only be delivered by licensed health care professionals.

Skilled care services at home—typically provided by nurses, physical and occupational therapists, or specially trained home health aides under the direction of a physician or nurse—are most often needed after an acute event such as a hip fracture, when follow-up rehabilitation services are needed at home after discharge from a hospital.

Ongoing home care services, considered to be custodial or supportive care, are usually provided by individuals such as home health aides, homemakers, and companions. Home health aides are trained to provide hands-on care and assistance to people in their homes who need help with ADLs (bathing, dressing, transferring, eating, toileting, or continence). They are also able to help with needed tasks such as cooking, shopping, and laundry.

Overview and Analysis

Homemakers or companions provide services that include light housekeeping, meal preparation, transportation, and companionship. This type of care is often appropriate for those with Alzheimer's disease or other forms of dementia who may be physically healthy but require supervision. Homemakers and companions are not trained to provide hands-on assistance with ADLs such as bathing and dressing.

The majority (68%) of the home health care agencies surveyed provide Alzheimer's training to their employees, and almost all (98%) agencies surveyed do not charge an additional fee for patients with Alzheimer's.

While most agencies surveyed provide an hourly rate, 76% of the agencies require a minimum number of hours per day ranging from a minimum of 30 minutes, to a maximum of 10 hours (approximately 3 hours on average). A small percentage of agencies (3%) provide a daily rate. Three in 10 (31%) agencies surveyed have a 24-hour or live-in rate. The average daily live-in rate for a home health aide is \$251 and \$247 for a homemaker/companion.

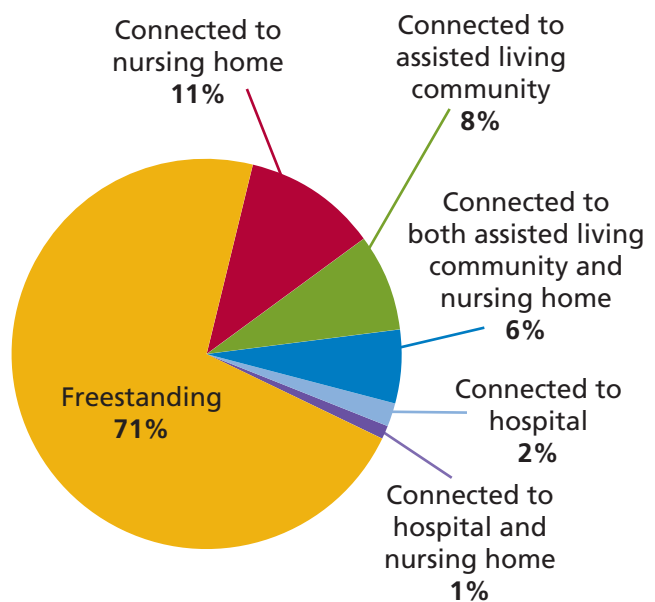

Adult Day Services

Adult day services provide health, social, and therapeutic activities in a supportive group environment for individuals with cognitive and/or functional impairments. Some are freestanding centers or programs; others are affiliated with a facility or organization such as a nursing home, assisted living community, senior center, or rehabilitation facility.

The majority (71%) of centers surveyed are not physically connected to or on the same grounds as a nursing home, assisted living

community, or hospital. Eleven percent are connected to a nursing home, 8% are connected to an assisted living community, and 6% are connected to both a nursing home and assisted living community.

Figure 6: Adult Day Services: Physical Connection to Hospital, Nursing Home, or Assisted Living Community

Care can be obtained in a social model, medical/health model, or a specialized model of adult day services. A social-model program provides meals, recreation, and some basic health-related services. A medical-/health-model program provides social activities as well as more intensive health and therapeutic services such as nursing services and rehabilitation therapy. A specialized program provides services only to specific populations such as those with diagnosed dementias or traumatic brain injuries.

Although each program may differ in terms of its features, these general services are offered by the majority of adult day services centers:

- › **Social Activity**
Interaction with other participants in planned activities appropriate for their conditions
- › **Health-Related Services**
Medication management, weight monitoring, blood pressure monitoring, and diabetes monitoring
- › **Transportation**
Door-to-door service
- › **Meals and Snacks**
Meals and snacks, including special meals for those with special dietary needs
- › **Personal Care**
Help with toileting, grooming, and other personal activities
- › **Therapeutic Activities**
Exercise and mental interaction for all participants

Adult day services centers have been providing care to those in need and have been assisting caregivers for over 30 years. The National Adult Day Services Association (NADSA) estimates that there are over 5,000 adult day centers in the U.S. serving over 260,000 participants and family caregivers.

Current codes, laws, and regulations governing adult day services are not uniform among the states. Although many states require their licensure or certification, the centers are not federally regulated. Many states have different

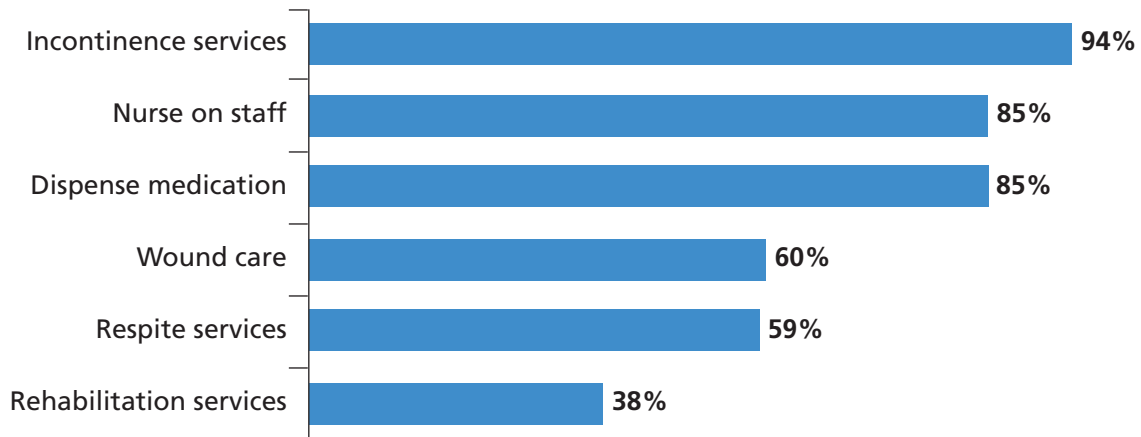

standards for social- and medical-model programs. States also vary widely in how they regulate, and how adult day services quote costs and charge fees. Vermont, for example, is the only state that requires adult day services to charge an hourly rate rather than a daily or half-day rate, which is common among most centers in the other states.

Most states have not established standardized criteria for enrollment or disenrollment, although most have provisions related to involuntary discharge. In those cases, the participant's care needs exceed those the centers can provide for or the participant presents a threat to himself/herself, to other participants, or to staff.

More than three-quarters of the adult day services centers surveyed are open Monday through Friday, 7% are also open on Saturdays, and 11% are open seven days a week. Among the 7% of centers that are open 24 hours, the majority provide full adult day services for all 24 hours. Sixty-three percent of centers provide transportation services to and from the center, and, of these, half do not charge a fee for these services. Of those that charge for transportation, the average one-way fee is just under \$10.

Almost all (98%) of the centers surveyed provide services for those with Alzheimer's disease, with 2% of these charging an additional fee. Ninety-four percent of the centers provide services for adults who are incontinent, 85% have a nurse on staff, 85% dispense medications, 59% offer respite services, 60% provide wound care, and 38% provide rehabilitation services.

Figure 7: Additional Services Provided at Adult Day Services Centers

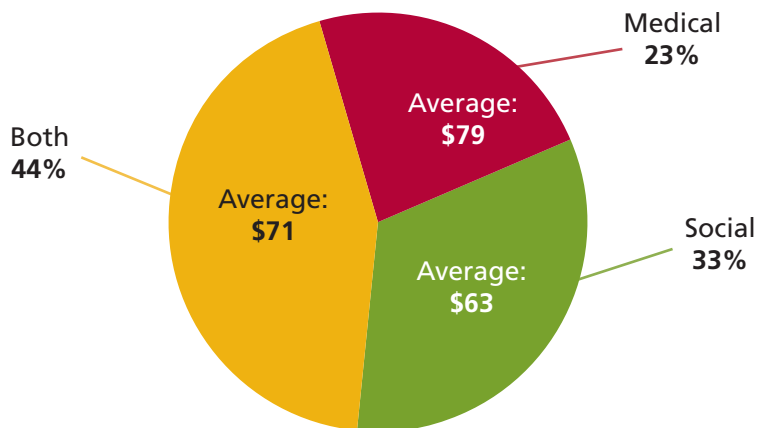

Capacity at the centers surveyed range from a minimum of 2 to a maximum of 300; the average capacity is 45. The average adult participant to staff ratio is 1:6, with a maximum of 1:20.

Costs will vary considerably depending on the level of services. Programs that operate using a medical/health model or a combination of medical/health and social model have higher costs than those using a social model alone.

The average daily rate for adult day services programs operating using a medical/health model is \$79, significantly higher than programs operating using a combined medical/health and social model (\$71) or a social model alone (\$63).

Just over two in 10 adult day services programs surveyed operate using a medical/health model, 33% operate using a social model, and 44% operate using a combined medical/health and social model.

Figure 8: Adult Day Services Model

Methodology

This survey of nursing homes, assisted living communities, home care agencies, and adult day services in all 50 states and the District of Columbia was conducted by telephone between April and August 2012, by LifePlans, Inc., for the MetLife Mature Market Institute.

The states were divided into three groups, according to their population—under 3 million, 3 to 10 million, and over 10 million. These groupings were determined using data from the 2000 U.S. Census and updates. The cities/areas surveyed were chosen on the basis of population and the ability to obtain a representative sampling of facilities and providers. For the “Rest of State” areas, a sample of service providers or facilities were randomly selected from all providers or facilities identified in the state not already identified in the Metropolitan Statistical Area (MSA) sample. Costs for this survey were calculated for each service provider in an area and were aggregated across all providers to compute a statewide average cost. Aggregated data was rounded to the nearest dollar.

Nursing Homes

Survey callers to the nursing homes requested to speak with the Director of Admissions or a comparable professional.

Nursing homes were called at random within each area and were required to meet the following criteria:

- › Must be licensed
- › Must provide skilled and custodial care
- › Must offer a private-pay rate for long-term care (custodial care), not the Medicare or Medicaid reimbursement rate

Of the nursing homes that met the criteria, private-pay rates were obtained for both private and semi-private rooms as available at the facility. If the nursing home did not meet the criteria, another was called until a minimum of 10 nursing homes or 15% of the homes in that city/area were obtained. Data from 2,078 nursing homes are included in the tabulation.

Assisted Living Communities

Callers to the assisted living communities asked for the Director of Admissions or a comparable professional.

Facilities were called at random and had to meet the following criteria:

- › Must be licensed according to each state’s standards for licensure
- › Must provide personal care assistance
- › Must provide private-pay rate

Of those that met the criteria, monthly base rates were obtained for a one-bedroom apartment with a private bath or a private room with a private bath.

The facilities were also grouped by the number of services included in the monthly base rate. Data from 1,513 assisted living communities, ranging in size from 2 to 600 beds, were included in the sample; the average number of beds per community was 63 beds.

Home Care Services

Callers to home care agencies asked for the Director or a comparable professional. Agencies were called at random, and had to meet the following criteria:

- › Must be licensed, if required by the state
- › Must provide the private-pay rate, not the Medicare or Medicaid reimbursement rate

Of those agencies that met the criteria, hourly private-pay rates were obtained for home health aides. If the agency did not meet the criteria, another agency was called until a minimum of 15% of the agencies, or five (whichever was greater) in that city/area or statewide, were obtained.

Agencies were also asked for hourly private-pay rates for companion/homemaker services. If necessary, some unlicensed agencies were also surveyed for companion/homemaker services to fulfill the quota. Data from 1,732 agencies are included in the tabulation.

Adult Day Services

Callers to adult day services centers asked for the Director or a comparable professional. Centers called at random were required to meet the following criteria:

- › Must be licensed, if required by the state
- › Must provide the private-pay, daily rate

Of those centers that met the criteria, daily private-pay rates were obtained. If a center did not meet the criteria, another center was called

until a minimum of 15% of the centers, or five (whichever was greater) in that city/area or statewide, were obtained. In some instances, geographic areas were expanded to meet the criteria. Data from 1,363 centers are included in the tabulation.

For this survey, the vast majority of centers surveyed provided a daily rate for services. In a significant segment however, only hourly rates and the hours of operation are provided. This is especially true for centers in Vermont, which are mandated to report costs in that manner. In order to standardize the cost reporting across all states, types of centers/ services, and operating hours, this report uses a “maximum daily rate” framework. In those cases where a daily rate is reported by the center, that cost is used directly. In cases where no daily rate is reported and only hourly rates and hours of operation are reported, the daily rate is calculated by multiplying the hourly rate by the hours of operation. This reflects the maximum that a private-pay client could pay for a full operational day of services, and the level of cost for which they must conservatively plan should they or a care recipient require these services.

In a small minority of instances where a center—usually affiliated with a nursing home or assisted living community—operates on a 24-hour basis with no reported daily rate, or provides 12+ hours of potential service, the average hours of operation for all other centers in that geographic MSA or statewide are used to calculate the daily rate for that center.

Note: Adult Day Services in some states are subject to regulatory mandates for fees while those in other states are not.

Some are freestanding centers offering only daytime social program model services with minimum hourly stay requirements. Others are affiliated with nursing homes offering more extensive medical services and charging higher daily fees accordingly. In any case, there is no national standard for reporting fees and costs. In addition, centers often offer a sliding scale for fees, and it is widely recognized that few clients actually remain for the entire time that a center might be available for services.

This wide variety of circumstances and typical absence of a mandated fee and cost structure creates challenges in reporting average costs for these services, and also for the consumer in planning for paying for these often critical services for both care recipients and caregivers.

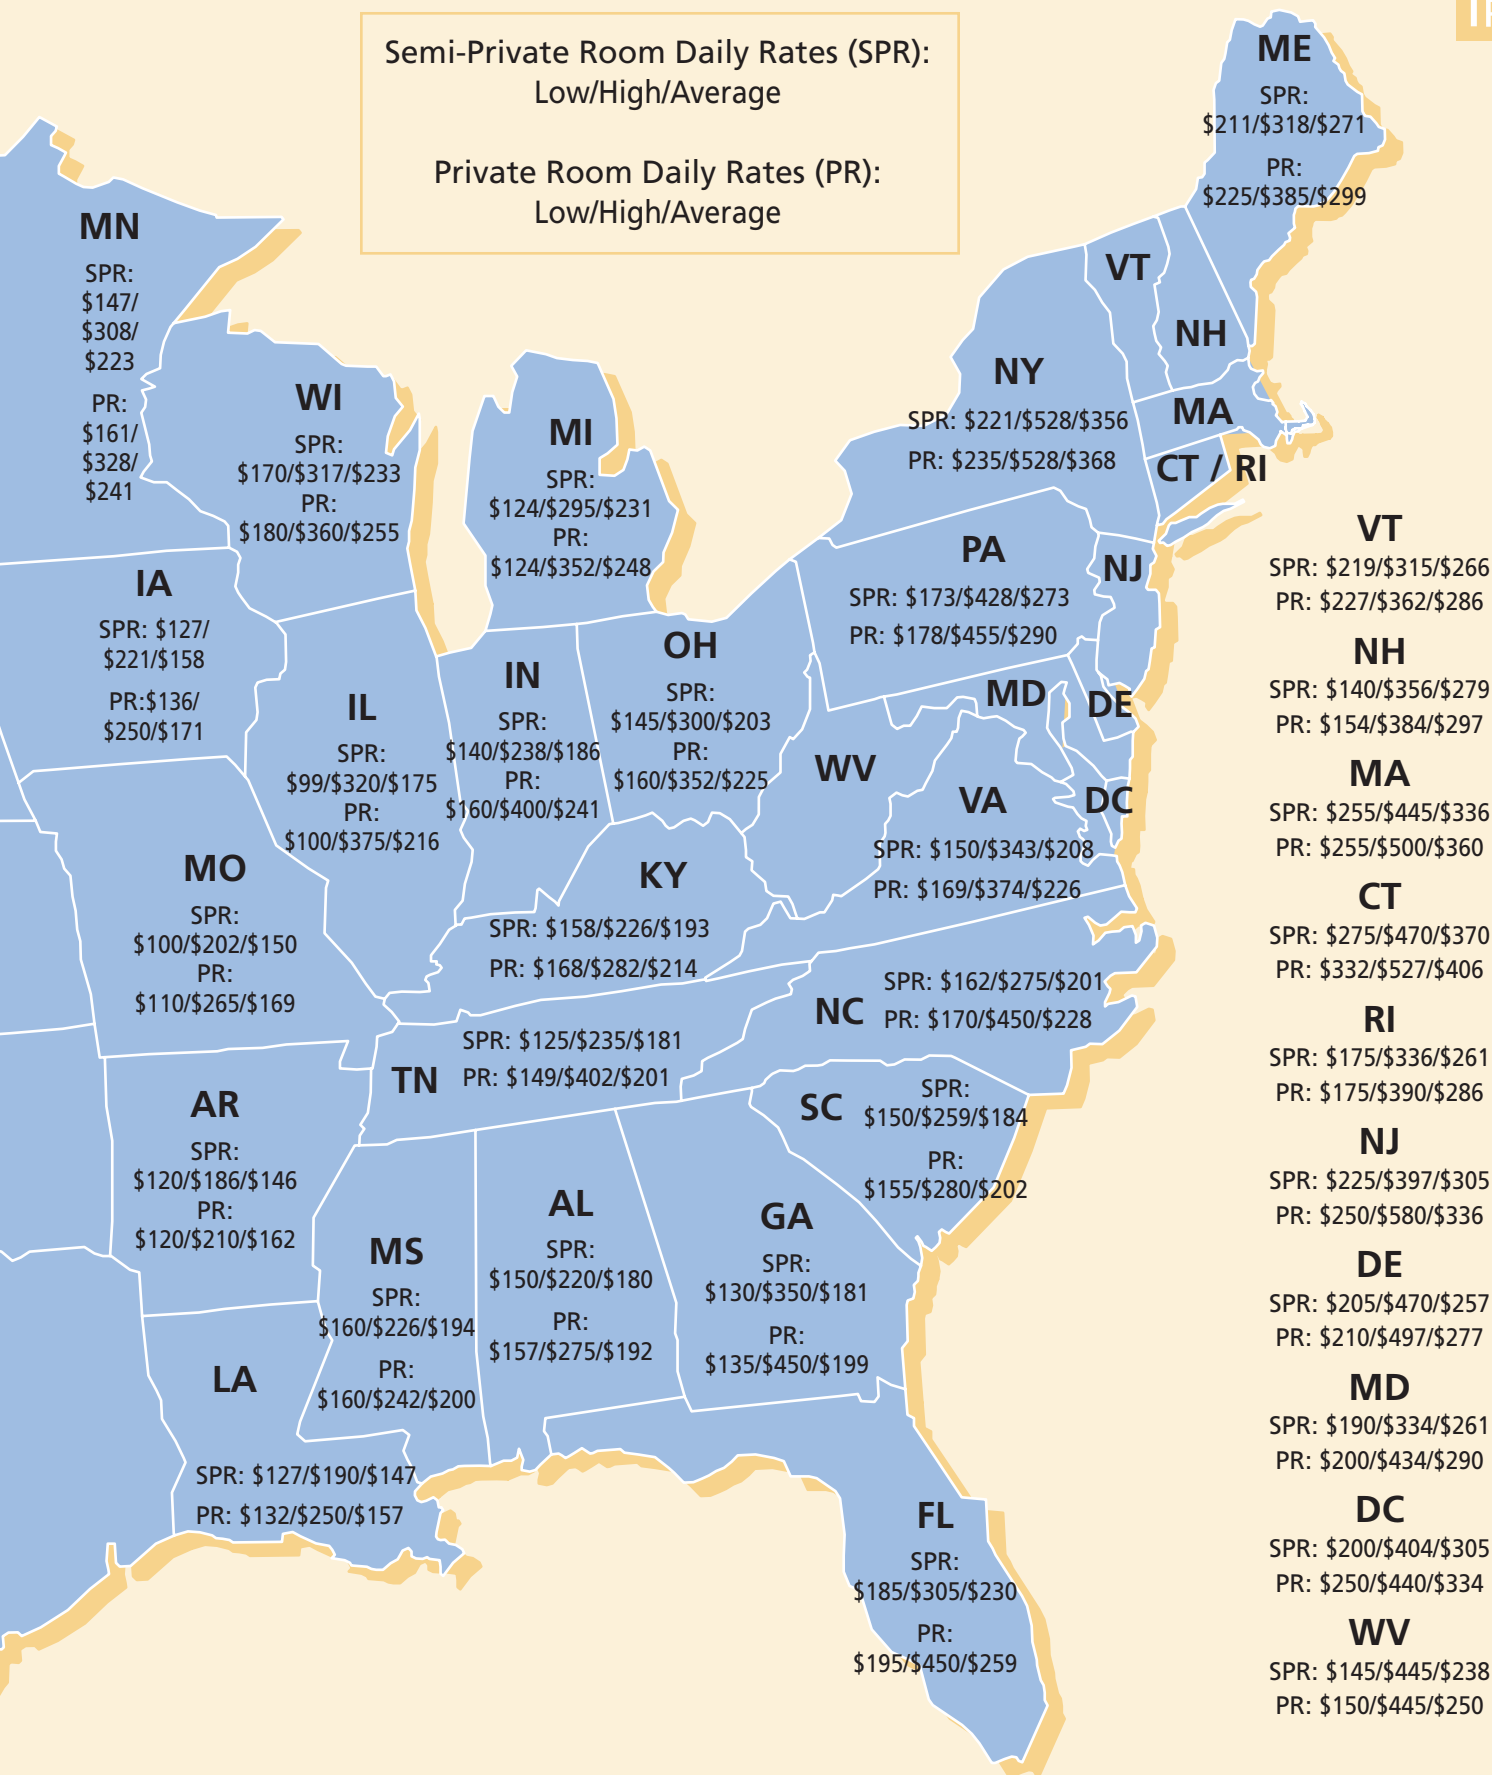

Nursing Home Costs 2012
